ABOUT CATCON

CATCON is a well-established nationally recognised Civil Construction Company, dynamic and progressive, service-focussed in our outlook, with strong foundations in our people. CATCON operates Australia wide and is consistently ranked as an *inBusiness Magazine* “Top 100 Company”. We are proud of our solid reputation and our respected name in the industry.

We are a professional, innovative, market focused Company, operating as a quality Civil Engineering constructor with a successful history as a Principal Contractor. We boast an impressive portfolio of Civil Engineering projects in the power (including renewables - wind and solar), mining, water and general infrastructure sectors.

The combined skills of CATCON's management staff and field teams, together with our desire to incorporate the latest developments in quality management, safety techniques, technology and in-field operational procedures enables us to provide high level and cost effective turn-key solutions to satisfy client requirements within the construction industry today.

CAPABILITY

CATCON can deliver a full suite of civil construction services for the power (including renewables - wind and solar), mining, water and general infrastructure sectors.

We have many multinational clients, we operate in all mainland states, across all sectors and we continue to achieve industry recognition through various excellence awards. Our Company is structured to deliver turn-key solutions at a cost, capability and overall project performance to meet our client's needs and expectations.

Our business operating strategy is to focus on the safety, quality and environmental aspects of project deliverables and provide a reliable and cost effective civil construction service whilst maintaining a proven history of successful partnerships. Projects are delivered by our skilled and experienced professional and field teams, all with extensive knowledge and capacity in the field of civil engineering and construction.

POWER

CATCON have developed an impressive project portfolio in the power sector, with the proven capability to work across regional and remote Australia. CATCON have undertaken major civil construction works for significant and large scale power related projects, including: Renewables (wind and solar farms), gas fired power stations and transmission works.

Our skilled teams have the hands-on expertise to undertake the design and construction, or construction only of civil works associated with power projects, across greenfield and brownfield sites.

MINING

CATCON have completed the civil construction works for a range of major projects across the mining sector, some located in the most remote and isolated areas in Australia.

Our capability includes earthworks, road works, structural concrete and service installations. CATCON's skilled teams have an in-depth understanding of the requirements to work in the mining sector, have developed expert knowledge and have well established supplier networks to support our operations for the mining sector.

WATER

CATCON's capability to undertake civil construction projects in the water sector has been proven through the delivery of projects ranging from large scale water storage facilities, major water supply pipelines, pumping stations, waste water collection systems and construction of waste water treatment plants.

CATCON have developed the skill, expertise, knowledge and have the hands-on delivery experience to complete the design & construction and construction only of major water sector projects.

GENERAL INFRASTRUCTURE

CATCON have an impressive history of delivering projects in the general infrastructure sector across all mainland states of Australia. Our clients include government authorities, private entities and local councils.

CATCON have achieved recognition with the receipt of various excellence awards in this sector, and have highly skilled construction teams that have the hands-on experience, knowledge and supplier networks to carry out a reliable and superior civil construction service for our clients.

DESIGN & CONSTRUCT

CATCON has a depth of expertise in Design and Construct projects. When coupled with CATCON's resource based structure, we are a worthy partner in the civil construction industry. Our design specialists have the experience and capacity to fast-track the design process for civil construction projects.

CATCON liaises with clients and stakeholders to provide specialised design services, from optimal road layouts to efficient footing/foundation design. Our full design and construct capacity reduces project start up times enabling CATCON crews to be on site faster to meet client expectations.

SNOWTOWN II WIND FARM

“At all times the works were carried out in a professional and workman like manner and the attitude and commitment of the whole site team was first class.”

Mike Gilmore - ***Collgar Wind Farm***

PRINCIPAL CONTRACTOR

CATCON have a demonstrated capability to successfully operate as the Principal Contractor for significant infrastructure projects across Australia. We have the required systems and procedures to operate and assume this role and have a successful track record for major construction projects.

CATCON understand the risks, can set the standards, and ensure compliance, leading to the promotion of safe and productive site work practices on major projects. We have extensive experience in effective communication management with all project stakeholders including; clients, government bodies, sub-contractors, land owners, retail/commercial operators and the general public.

"CATCON approached the project with a co-operative attitude which minimised client involvement in their work and also helped develop positive ongoing relationships with all stakeholders"

Colin Paterson - ***NP Power***

SAFETY

CATCON recognise that the health, safety and welfare of its people are of paramount importance to the company. CATCON encourages everyone to continually improve their overall health and wellbeing. Management is responsible for taking all practical action to achieve and maintain a standard which safeguards the health, safety and welfare of all employees. We comply with all statutory requirements and relevant Australian Standards, and in many cases exceed safety management practices required by our AS4801 accreditation.

CATCON strives to provide and promote conditions of work that facilitate a safe and healthy environment across the company, and is committed to establishing measurable objectives and targets to ensure continual improvement aimed at elimination of workplace injury and illness.

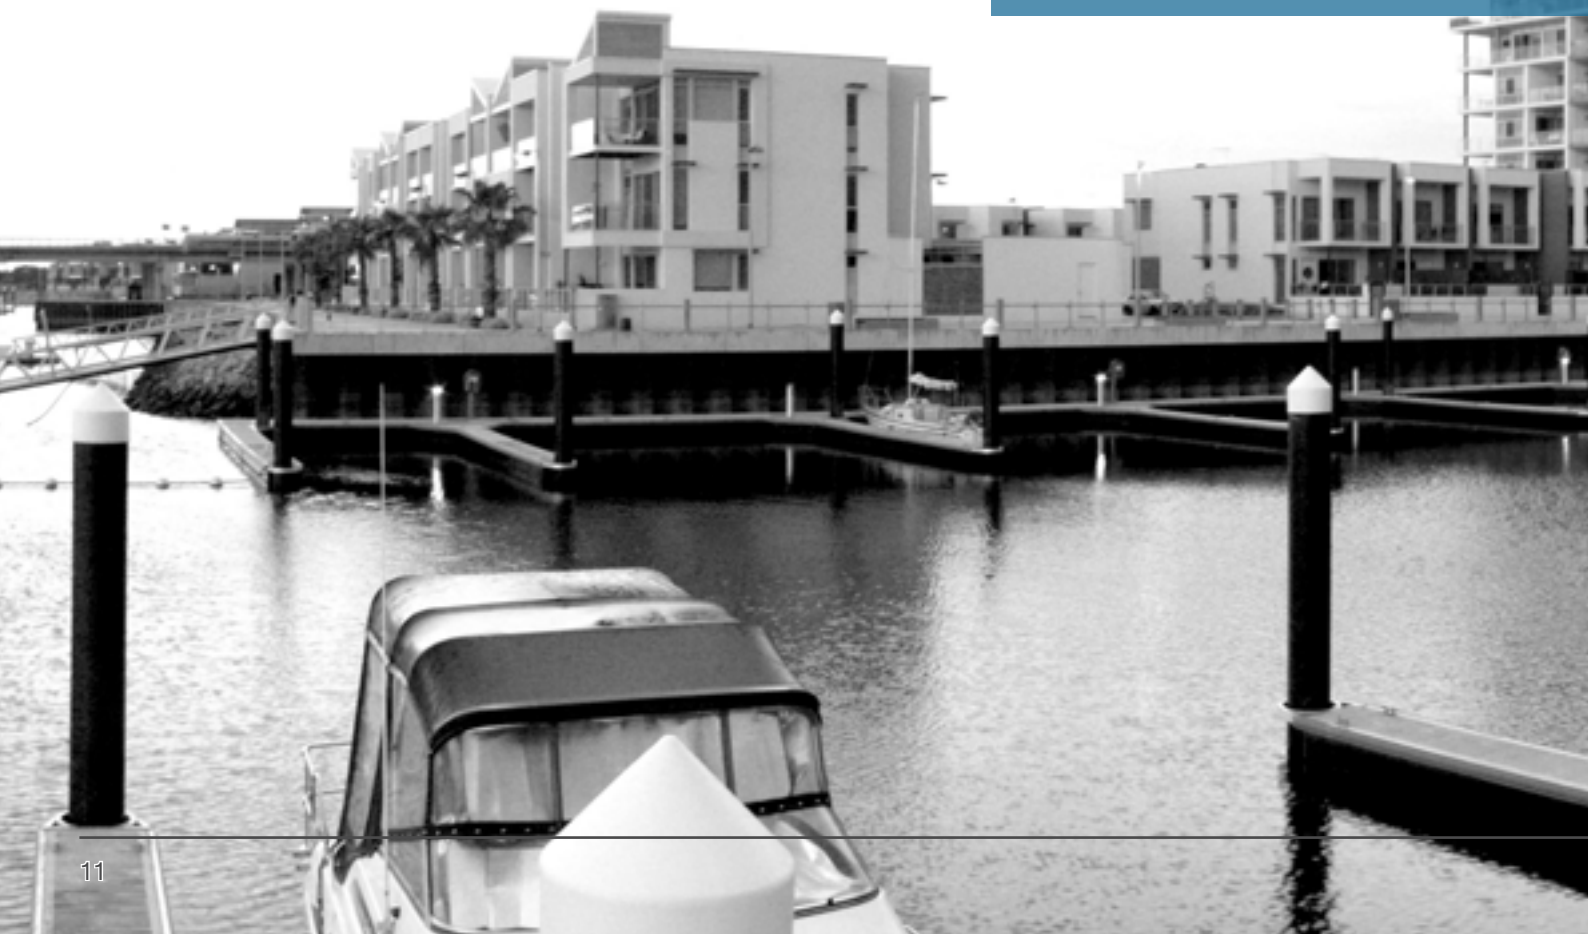
QUALITY

CATCON's quality system ensures that the delivery of civil construction projects is achieved in accordance with all relevant legislation, contractual requirements, and satisfies the client's objectives. Project Management is facilitated through the CATCON Management System which is regularly audited to exceed ISO 9001 standards.

CATCON is committed to the realisation of the client's objectives through an emphasis on management commitment to, and our employee's involvement in, the quality requirements of the project from commencement to completion.

"I found CATCON very good to work with and professional in their approach to the project... It was refreshing to work with a company who understood the complexities of the task at hand and could communicate the site issues in a timely and professional manner"

David Ellery - ***Origin Energy***



ENVIRONMENT

CATCON is committed to developing and implementing sound environmental management objectives and implementation of plans to eliminate risks across all projects. CATCON adopts effective measures on all projects with the aim of minimising environmental harm or impact, in accordance with our ISO 14001 accreditation. CATCON provide appropriate training and resources for personnel to carry out their duties in environmental management.

OUR PEOPLE

CATCON's workforce has been selected for their high level skills, competency and ability to support our wide range of projects across Australia. CATCON's project teams are modelled consistently across all projects allowing experienced project teams to mobilise quickly across our various projects.

CATCON is an Equal Opportunity Employer and full compliance to the National Standards and Code and in some cases lead the industry. We are committed to providing our people with opportunities and the best environment to develop and work on major civil construction projects across Australia.

INDUSTRIAL RELATIONS

CATCON have well established Industrial Relations systems and continually strive to improve the quality of our service, performance and productivity. The identification, minimisation, management and resolution of issues, which have an industrial impact, have been crucial in continuing our solid industrial relations reputation.

CATCON have the proven capacity to successfully implement and operate Industrial Agreements across Australia and have the infrastructure in place to meet the most stringent industrial standards required and to be responsive to meet a wide range of project requirements in the Power, Water, Mining and General Infrastructure sectors.

CATCON's employment practices ensure equal employment opportunities and are free of discrimination.

FLEXIBLE WORKFORCE

Our teams have extensive experience working in regional, remote and metro areas. This experience has been developed across our core workforce built up over many diverse projects around Australia.

We have the capacity to mobilise with minimal lead-in time as a result of CATCON's well established and effective corporate infrastructure, management and quality systems.

This is supported by a wide range of long-term supplier relationships and the management of a modern fleet of equipment.
